Intent-led prospecting with zero static lists.
- **AI Visibility Audit Engine (Personafyed):** Architected and deployed a production audit system orchestrating DataForSEO, Serper, Google PageSpeed, Perplexity, and Anthropic (Claude) APIs via a scheduled AI agent on Railway; generates client-ready AEO/SEO reports used as outbound lead magnets.
- **Outbound Revenue Infrastructure:** Built multi-inbox cold-email systems (Instantly) with warmed domains, sequenced messaging, and deliverability management; engineered Clay enrichment tables layering LinkedIn, web-traffic, and tech-stack data with AI-generated personalization and ICP scoring.
